Introduction

"Mobile App UI Template Pro" is a GUI template targeted for mobile applications. It contains UI structure of different types of apps which would help guide developers to build quality UI for their mobile apps.

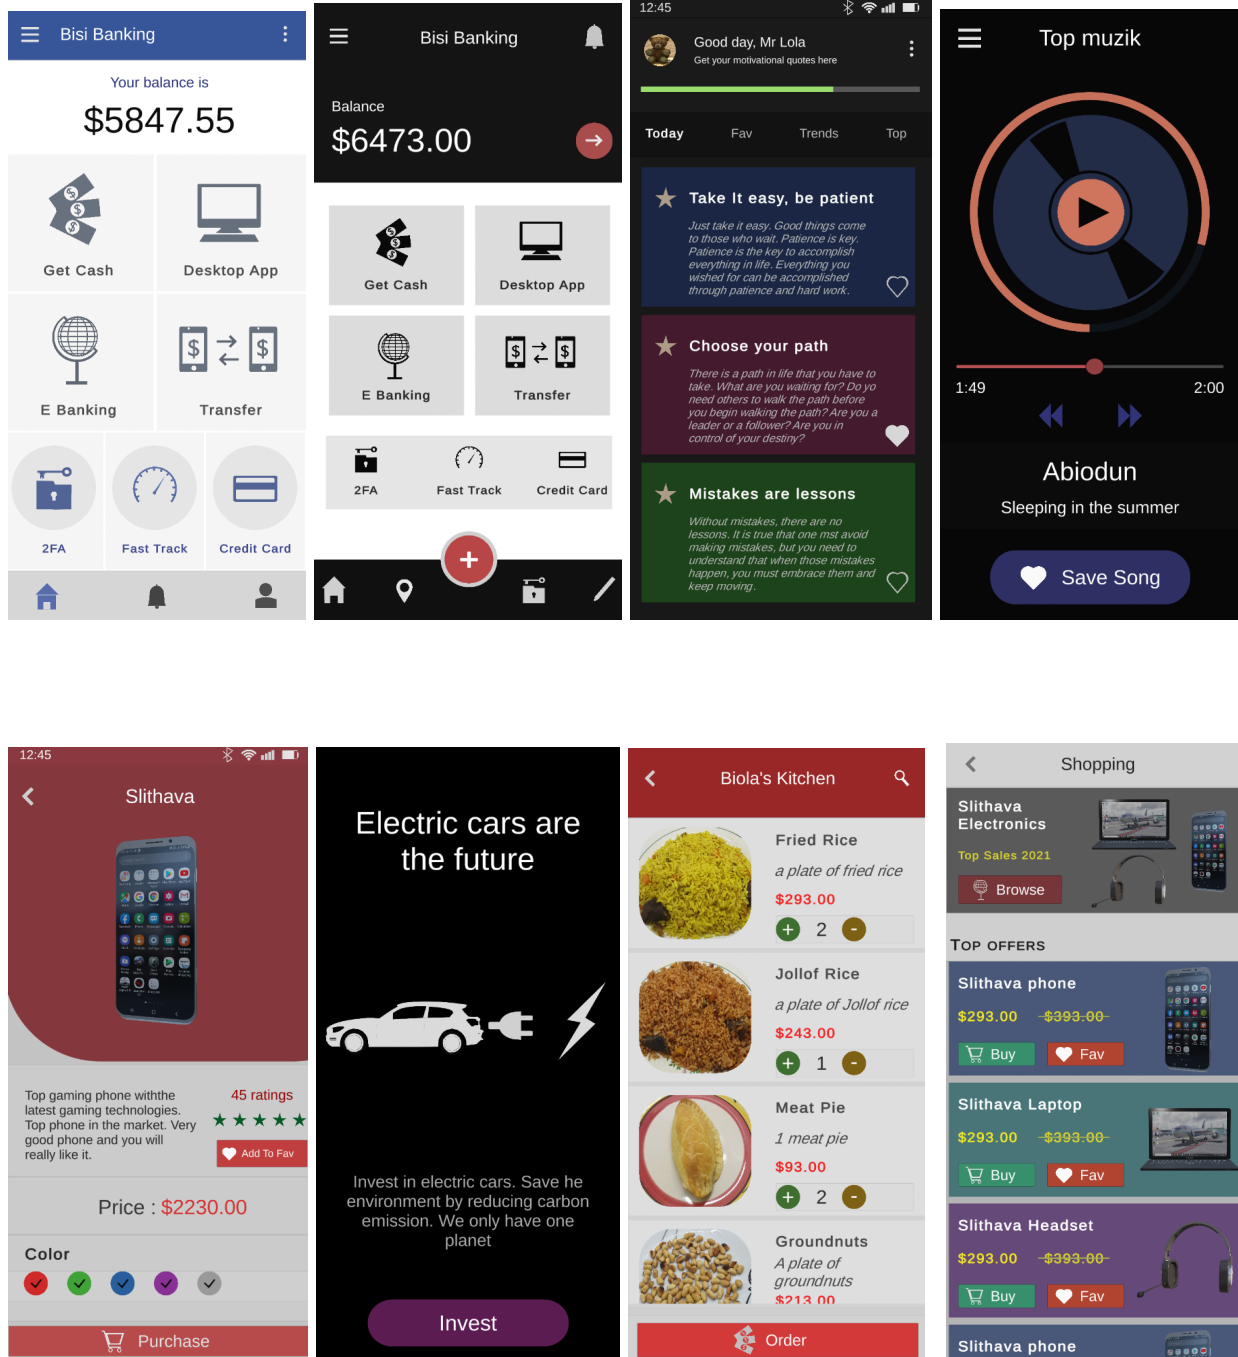

Game View

Make sure the game view is 740 x 1500.

Who is this tool for

If you are looking at building a non-gaming application or non gaming UI for your game projects (e.g. login page), then this template would serve as a guide for you.

Some Screenshots

Scripts

This template contains little scripts that give the UI a little bit of custom functionalities. This includes behaviour such as

- A text that updates and shows the value of a slider.
- An “add quantity” component like the one used to adjust product quantity on shopping sites.
